

Rocket® UniVerse

Deliver fast, flexible, and secure applications with low overhead

Rocket UniVerse provides everything you need to develop and deliver robust applications that evolve with the needs of your business. As part of the Rocket MultiValue Application Platform, UniVerse powers thousands of business-critical operations across industries such as finance, healthcare, manufacturing, distribution, retail, and higher education. Organizations worldwide rely on Rocket® UniVerse to build applications that are fast, flexible, resilient, and secure.

Benefits/Features

Performance to spare

Create, deploy, and maintain high-performing business applications with short time to value.

Secure and auditable

Implement enterprise-level data security and compliance.

Resilient

Ensure resiliency with robust HA/DR configurations.

Low TCO

Minimize costs with simple administration and small hardware footprint.

Compliant

Audit Logging capabilities let you easily establish configurable audit histories for assets and events so you can demonstrate compliance.

Modern

Using free tools, add a modern web front end and integrate it with other systems, such as third-party apps and hardware like tablets and smartphones.

What our customers have to say

Security, reliability, accessibility. These ought to be the main considerations for users of any software, and particularly application development software. Version 14.1 of Rocket's application development platform builds on over 30 years of continuous development by enhancing each of these key factors. With its updates to OpenSSL and Python, and enhancements to business continuity, together with its modest hardware requirements and outstanding performance, UniVerse 14.1 is an easy choice for existing UniVerse users and a worthwhile considerations for those looking for a new place to store business critical data."

MARTIN A. SHIELDS
Senior Technical Consultant
Meier Business Systems

With UniVerse you can:

Deliver high-performance apps

Rocket UniVerse is an ideal platform for delivering high-performance Online Transaction Processing (OLTP) applications with complex business rules.

Accelerate your teams' productivity

Accelerate your teams' productivity by selecting the best development tools based on your staff's skills including Python and MV BASIC for Visual Studio Code.

Rest easy knowing your data is secure

Security is paramount and UniVerse offers flexible security purpose-built for on-premises or cloud deployment.

Ensure business continuity

High availability and disaster recovery (HA/DR) are both essential for business continuity. Manage your environment effectively with Rocket UniVerse HA/DR features. Harness UniVerse Replication to meet your Recovery Time and Recovery Point Objectives.

Rocket UniVerse is designed for HA/DR

High Availability and Disaster Recovery

Enables maintenance without production outage

Protects against failures and attacks

Use Replication to set up a report server to offload reporting and analytics

Modernization. Without Disruption.™
